PROJECTS

VentureForge AI – Multi-Agent Business Intelligence Platform | GitHub | Live Aug' 26 – Present

- **Built** a **Nest.js/PostgreSQL backend** for a multi-agent platform that turns startup ideas into business blueprints, with **parallel agent orchestration** and async job processing via **BullMQ and Redis**.
- **Integrated** multiple **LLM APIs** for market research, competitor analysis, risk analysis and document generation, with real-time progress streaming over **REST APIs** to a Next.js frontend.
- **Instrumented** the system with **Prometheus and Grafana** for observability, on a Docker and Nginx stack.
  Tech: Next.js, Nest.js, PostgreSQL, Redis, BullMQ, Docker, Nginx, Tailwind CSS, Prometheus, Grafana

Kissan Mithar – Smart Agriculture & Farmer Advisory Platform | GitHub | Live Sep' 25 – Dec' 25

- **Built** a **React.js web interface** and **Flutter mobile app** on **15+ event-driven microservices** (Node.js, REST APIs) with **RabbitMQ and Redis**.
- **Implemented** secure authentication, soil analysis, expert consultation, a **PostgreSQL-backed marketplace** and **Gemini AI and Plant.id** crop disease detection.
- **Automated** releases with **Docker and Jenkins CI/CD**, deploying the microservice fleet to **AWS EC2** with **Nginx** as reverse proxy for load balancing.
  Tech: React.js, Node.js, Flutter, PostgreSQL, Redis, RabbitMQ, Docker, Nginx, Jenkins, AWS EC2

PII Redaction Engine – Technical Assignment | GitHub | Live Jun' 26

- **Built** a **Python pipeline** that automates detection and redaction of PII in DOCX files across 9 PII categories, combining **Microsoft Presidio, spaCy NER** and custom pattern recognizers.
- **Designed** a **context-aware validation layer** that separates detection from approval using section-awareness, confidence recalculation and protected-span checks, cutting false positives.
- **Validated** on one complex technical resume (single test case, not a benchmark): 300 raw candidates narrowed to 3 true PII instances, **100% precision and recall**, no technical terms altered.
  Tech: Python, Microsoft Presidio, spaCy, NER, Rule-Based Validation, DOCX Parsing
